You can find interesting plants everywhere in Britain and Ireland. This site is intended to help you identify them.

On the following pages you will be presented with a [questionnaire](#) on the characteristics of the plant you are trying to identify. Fill in the form and press search, the computer will then try and identify the plant you have found.

You may also like to use the system to obtain a check-list of plants from a particular habitat or perhaps find flowers of a particular colour to grow in your garden. Feel free to experiment, there are many uses for the system.

Please feel free to send me your comments, particularly where improvements can be made.
